

Hire North Georgia's Premier Repipe Specialist.

Four Considerations for Selecting a Pipe Replacement Plumber

1) The Most Experience – and the Best Work Force

Plumbing Express specializes in turn-key repipes, and has installed over 10 Million feet of pipe in Georgia. Even though whole house pipe replacement can be challenging for a homeowner, it is NOT to us. Our proven method of pipe replacement is why we are preferred and recommended by home inspectors and realty professionals all over the state of Georgia. With an expert's touch, our skilled repipe specialists have replaced the pipes in thousands of homes. There is no better plumbing company to fix leaks in the walls or in the slab of your home or income property. Our team is comprised of full-time W2 Employees and simply remains the best option for your turn-key replacement of polybutylene, failing pex, and corroded copper.

2) The Best Materials – and a Transferable Warranty

To ensure a high-quality water system in your home, we install premium pipe, fittings, and valves made in the USA. Our FlowGuard Gold® Plumbing Systems come with a 30-year warranty. This rock-solid warranty transfers from owner to owner for the full term. See the separate insert in this packet, or visit the Repipe Specialist section of our website for detailed information about common failing pipe systems and why FlowGuard Gold® is our recommended way to go.

3) Quick Turn-Key Services – and a System Design to Last a Lifetime

Choosing us will bring you a thorough, satisfying result. Our turn-key repipe services even includes absolutely beautiful sheetrock repair and ceiling texture match. Clients receive a consistent service that is typically completed in 2-5 days. Our systems withstand the harshest winters. We do not install pipe in your attic unless it is absolutely necessary. On cold days, piping in attics can freeze and burst, causing damage to your home. On occasions when some pipe must be installed in the attic, our engineer-approved method of insulation has been tried and tested.

4) Flexible Payment Options

Repipe now and pay at your real estate closing or take advantage of our special financing with approved credit.

In addition to being repipe specialists, we offer water heater services, sewer/drain cleaning, general plumbing services, and more.

Schedule your repipe today!
